

Sources

Note* In the beginning of my research and publication I thought it beneficial to have a “Sources” section with each Introduction for each Volume of text. However, I have added so many citations that the number of pages precludes such an approach. Thus, the Sources section will be published as a separate “Sources” Volume. An outline or Table of Contents for that volume is as follows:

<u>Sources</u>	<u>Page</u>
A. A Brief History of the Knowledge of the Literary Structures and Language of Ancient Scripture Up Until the Time of the Book of Mormon	
B. A Chronological List of English Reader-Friendly Sources on Hebrew-like Literary Language and Structures That Relate to the Book of Mormon	
C. A Chronological List of Pertinent Writings on Bible Quotations and Language That Are Part of the Book of Mormon	
D. A Chronological List of Pertinent Writings on Ancient Hebrew Law That Are Part of the Book of Mormon	
E. A Chronological List of Pertinent Writings on Author Attribution Parallels and Stylometry As They Relate to the Book of Mormon	
F. Chiastic Structures	
G. An Accumulation of Additional Sources Yet to Be Integrated
