YEAR1            PERSON            PRIMARY SOURCE2

Note 1: The mark ^ after the year is purely a research tool indicating that a copy of the article or book is on file in the author's personal library.

Note 2: The year (listed on the left) for the event or quote is not always the same as the date of the primary source (listed on the right) from which the information was taken. If the source information (the later publication of the information) was significant, in and of itself, to the later time period in which it came forth, there will also be a separate listing for that later year. When appropriate, additional sources will be listed.
